

Anunnaki

Conspiracy Subject: Anunnaki and the Origin of Humanity

Category: Aliens (Ancient)

Summary: Zechariah Sitchin's translation of ancient Sumerian texts described the origins of humanity being from an alien race known as the Anunnaki. Sitchin, in his book "The 12th Planet" published in 1976, explains why the Anunnaki came to Earth and their influence on the creation and development of the human race. He continued to publish a series of books that followed called the "Earth Chronicles" adding more details to Anunnaki legend that spawned a mythos that has continued to grow even after his death in 2010.

Here are the key facts about the Anunnaki according to Sitchin's translations:

- They came from a planet named Nibiru, which is the 12th planet in our solar system (Pluto, the Moon and the Sun are counted in the first 11). Nibiru has an elliptical orbit that takes it far beyond the orbit of Neptune, but returns to the inner solar system every 3,600 years.
- They came to Earth looking for gold to replenish their atmosphere and created humans to be their slave labor in the gold mines.
- The Face on Mars is the burial place of an Anunnaki leader named Alalu
